## CAREER SUMMARY

---

Dynamic Full Stack Developer skilled in Java, Python, TypeScript, React, Node.js, Express, Flask, MongoDB, and MySQL, with hands-on experience building scalable web apps, AI-driven financial platforms, and real-time analytics systems. Strong in Data Structures, Algorithms, and System Design, with proven ability to deliver high-performance, user-focused solutions in Agile and CI/CD environments.

## EDUCATION

---

|                                                        |               |
|--------------------------------------------------------|---------------|
| <b>SR Institute of Management and Technology</b>       | 2022- Present |
| Bachelor of Technology, Computer Science & Engineering |               |
| <b>Ram Lakhan Public School - Varanasi, UP</b>         | 2020-2021     |
| Senior Secondary- <b>CBSE</b>                          |               |
| <b>Ram Lakhan Public School - Varanasi, UP</b>         | 2018-2019     |
| High School - <b>CBSE</b>                              |               |

## SKILLS

---

**Language:-** Java, C, Python  
**Frontend:-** HTML, CSS, JavaScript, React, Typescript  
**Backend:-** Node.js, Express, Flask  
**Databases:-** MongoDB, MySQL  
**Version control:-** Git, Github  
**CS Fundamentals:-** Data Structure & Algorithms

## WORK EXPERIENCE

---

**WelthWest AI (OPC) Private Limited** JULY 2025-- PRESENT  
Full Stack Development Intern  
Developed advanced features like backtesting engines, AI-driven analysis, financial chatbots, and automated stock research modules.  
Built scalable backend services using Node.js, Express, and Flask, integrated with React & TypeScript frontend.  
Optimized financial data handling with MongoDB & MySQL for real-time analytics.  
Collaborated in Agile methods and teams with Git/GitHub and CI/CD workflows.

## PROJECTS

---

**WelthWest.com – AI Hedge Fund & Backtesting Platform** [Link](#)  
Co-developed an AI-driven stock research and analysis platform as part of internship at WelthWest.  
Implemented chatbot (NLP), AI-driven technical analysis, and backtesting engine.  
Built and optimized Flask (Python) backend with MongoDB & MySQL for scalable data handling.  
**Explore Indian Islands**  
Developed a responsive web platform to explore Indian islands with search and filter options. Designed an engaging, mobile-first UI/UX, applied performance optimizations, and structured the application for scalability and future API integrations.

## CERTIFICATIONS

---

|                                                                     |                                  |
|---------------------------------------------------------------------|----------------------------------|
| <b>Programming in Java – NPTEL (IIT Kharagpur)</b>                  | <a href="#">View certificate</a> |
| Covered OOP, multithreading, exception handling, and collections    |                                  |
| <b>Database Management Systems – NPTEL (IIT Kharagpur)</b>          | <a href="#">View certificate</a> |
| Learned SQL, relational models, transactions, and normalization.    |                                  |
| <b>Design &amp; Analysis of Algorithms – NPTEL</b>                  | <a href="#">View certificate</a> |
| Focused on complexity analysis, algorithm design, and optimization. |                                  |
| <b>MERN Full-Stack Development – Apna College</b>                   | <a href="#">View certificate</a> |
| Built full-stack apps with MongoDB, Express, React, and Node.js.    |                                  |
| <b>Data Structures &amp; Algorithms – Apna College (Ongoing)</b>    |                                  |
| Practicing arrays, trees, graphs, and dynamic programming.          |                                  |
